26th July 2010

To whom it may concern,

My name is Shay Hurson. I am the Operations Director with Henley Forklift Group Ltd, main importers of Mitsubishi Forklifts in Ireland.

Over the past 20 years we have worked with C&G Engineering Ltd. They have been one of our main suppliers of custom made cabs/components and general engineering solutions to suit our products.

I have always found the people at C&G to be extremely easy to work with, while at the same time upholding a totally professional approach to their business. Their dedication to producing top quality product and customer service is second to none. They pride themselves in "partnering" with their customers to ensure solutions are achieved to meet the needs of their customers' clients. They work on the principle that if their customers are successful then C&G are successful.

During the time we have worked with them they have successfully manufactured many products for us, ranging from component parts such as doors and windows to complete cabs. They have always met our delivery needs in terms of schedule and quality. We have found them to be very flexible and willing to handle both large scale orders as well as one off small orders at short notice.

An appealing aspect of their operation to us is the fact that they can handle full life cycle execution of a project, from design and fabrication through to final finishing, all in house. This, for us, gives the confidence that we will receive a product that has had full quality control from start to finish from a single source.

We have enjoyed working with C&G for many years and hope to continue working with them into the future. We have no hesitation in recommending C&G Engineering Ltd's services to anyone who requires quality products in market sectors similar to our own.

Yours Sincerely

A handwritten signature in black ink, appearing to read "Shay Hurson".
